

# Dev Solution - E-Commerce Website Package Terms & Conditions

## Package Overview

This package includes the development of an online store for businesses, allowing them to sell products or services through a fully functional website. The features included are:

- Online store setup (any type of selling website)
- Shopping cart functionality with automatic calculation of selected item prices
- Online payment integration (via PayFast, PayPal, or other approved gateways)
- Mobile-responsive design and professional layout
- Integration of up to [customize number] product pages (additional pages can be added upon request)

## Pricing & Payment

- The base price for the E-Commerce package starts at R5,000.
- Final price may increase depending on design complexity, additional features, and extra requirements requested by the client.
- A 50% upfront payment is required before the commencement of development.
- The remaining 50% is payable upon completion of the website, prior to the site going live or handover.

## Deliverables

- Fully functional online store with shopping cart and checkout system
- Admin panel for product and order management
- Payment integration for secure online transactions
- Optional: integration with external platforms such as Shopify (upon client request)

## Client Responsibilities

- Provide all necessary product information, images, and descriptions
- Ensure that content provided does not infringe on copyright or trademark laws

- Respond to requests for feedback and approvals in a timely manner

### Project Scope

- Dev Solution will deliver an online store based on the agreed-upon specifications and requirements.
- Any additional features, changes, or functionality not included in the initial scope may incur additional costs and will require a separate agreement.

### Additional Notes

- This package is specifically designed for building E-Commerce websites and online stores.
- Dev Solution reserves the right to recommend design and functionality improvements to ensure optimal performance and user experience.
